

FIBER CONCRETE - FURNITURE

Inspired by the Brutalism Architecture movement of the mid-20th century, fiber concrete has become the signature material of the 101 Copenhagen furniture collection. Emphasizing sculptural shapes, the texture of concrete creates a fine balance between sharp architectural lines and soft organic curves. Cast in lightweight fiber concrete, each product gets a unique tactile surface with small incorrections and nuances. The surface is afterwards coated, to create a strong and resistant product. Finally, the product is hand painted two times by brush, to create a brushed layered color.

This product is hand painted to create a unique textured surface. A touch-up kit is included in the package for small scratches and marks. Please shake the paint before use. Apply a thin layer with brush or cloth. Only use on damaged area.

It is advised to have at least two to three people handle the product to prevent any damage. It is also advised to avoid sharp objects as they can harm the surface of the product. The product cannot stand in extreme high temperature and sunlight for several months. High humidity levels can also cause the product to absorb moisture, causing it to become soft and fragile. When exposed to extreme heat or cold, the product may expand or contract excessively, causing it to break or become damaged. This furniture is exclusively designed for indoor environments.

Maintenance:

For daily cleaning, a dry or wet cloth can be used to remove dust or dirt. However, cleaning products containing acid should not be used as they may harm the surface of the product.
