POV Circular Vase is a light, smart and playful design. Beautiful on its own and stunning as graphical patterns on the wall. In the movies the Point Of View is right where the camera is aiming. The eye of the viewer. And depending on that point of view, things will change - settings, stories and the way we interpret things. And if you move around the different objects and shapes in the POV series, you'll notice that also your view alters the object. From some angles they will seem like flat graphical drawings and as you move around them suddenly the graphic lines float in mid air. Shadows and shapes change, making the POV series fun to interact with.

About the Designer

Note is a Stockholm-based design studio founded in 2008 and working in the fields of architecture, interiors, products and graphic design. "We are seldom inspired by the design world," they tell us. "Instead we influence each other, pushing ourselves further and further towards our goal - world domination!" That playful sense of humour is at the heart of their practice too. "We want to put a smile on the user's face, and for there to be a friendly and welcoming sensation that follows through the whole experience of the product. We want to affect people in a positive way."
