CARE GUIDE — TEXTILE

HOW TO CLEAN / POLISH

WOOL

Daily cleaning: Use the vacuum cleaner frequently — especially when the rug is new, as it will produce shed fluff for a period of time.

Stains: Immediately dab the area with a white cotton cloth to prevent the stain to penetrate the fibers. Carefully sprinkle a bit of water on the stain and dab again with a white cotton cloth. If the stain has not disappeared the rug should be cleaned by a professional. Never clean the rug with chemicals.

(Note that colours may fade if the rug is exposed to strong sunlight for a longer period of time)

(Staining from the backside of the rug might occur. It is therefore recommended to use an underrug on vinyl, oil and untreated floors)
