About us

Form & Refine is a Danish design brand that celebrates materials, form and sustainability equally. Our pure materials are carefully selected and skillfully crafted locally using time-honored traditions. We celebrate the natural form of our materials and create collections of refined Nordic design.

Form & Refine was founded in 2018 by Helle Herman Mortensen, Jonas Herman Pedersen and Lasse Lund Lauridsen– based on the common vision of creating a value-driven design brand that explores materials and preserves our earth and craft cultures through an exceptional design philosophy.

We believe in sustainability by choosing local materials neighbouring local workshops and thereby reducing our CO₂ footprint. We also believe in making a positive social impact and preserving crafts by working with cooperatives and smaller workshops to create fair and respectful partnerships.

We see design as an artistic expression but equally as a functional object that never compromises on quality. In our opinion that is the foundation for long-lasting design that will be remembered, repeated, and refined for generations.

We are FSC®-certified under the number SCS-COC-005763-DX (FSC®C132484). Ask for our FSC®-certified products.

Blueprint Chair

An archetypical chair by Form & Refine – made completely out of wood or with an upholstery seat

” With this chair we searched to balance something refined and robust at the same time. We aimed for a chair with distinct character and gave it elongated back legs that smoothly grip the curved backrest. It should also be stackable, comfortable and fit into any environment.” - Herman Studio

Jonas Herman, Head Designer

Our main collection is designed by Jonas Herman, Herman Studio. He understands the world through materials and what he makes from them. Jonas Herman has both. With help from machines and experts and an experimental approach to building and constructing, he relies on his hands and quality materials and an unflinchingly explorative mindset.

Chairs are Herman's 'forever love', and even though the chair is, by definition, the most complicated furniture type to design, it also represents a task where experience, craftsmanship, technique and knowledge can come together in a truly meaningful solution. Blueprint Chair and Block Lounge Chair are both designed by Jonas Herman.

Aesthetic is a constant factor, springing from Herman's fascination with natural wood and all the purposes it can be used for, if you have the skill and imagination.

Shoemaker Chair™

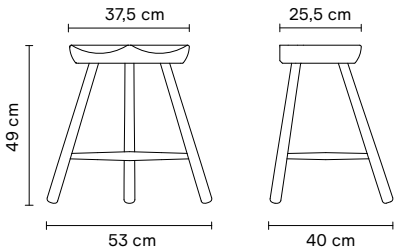

A true classic made in Denmark since 1936 – where it is still to this day produced by our local joinery. The seat has been rendered out of one large solid piece of wood and because of the variations in the woodgrain, every Shoemaker Chair™ is completely unique.

A Line Storage Bench 111, Indigo Blue, Special Edition

"The A Line Collection is designed to embellish practical areas in the home and to ensure the joy of use and storage."

- Jonas Herman, Herman Studio

A Line Collection

A Line is a collection of functional furniture made of a mix of rediscovered classics and reinterpretations of storage essentials. Furniture that in each way solve functional everyday chores at home. From shoe rack, to storage bench and stepstool. The functionality does not erase the aesthetics nor our search for sustainable materials.

This year we celebrate our 5 years anniversary with a special edition of the first and most popular piece in the A Line Collection; A Line Storage Bench 111. It comes in a stained Indigo Blue colored ash.

The collection is designed by our head designer Jonas Herman, Herman Studio.

Left: A Line Storage Bench 68, Oak
Right: A Line Storage Bench 111, Black

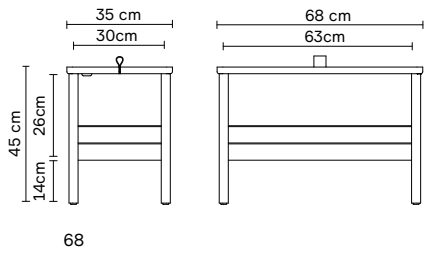

A Line Storage Bench

A Line Storage Bench is an updated version of the classic storage bench – where functionality meets clean form. A solid and versatile bench with slightly reduced dimensions and minimalistic characteristics.

Multi-functionality

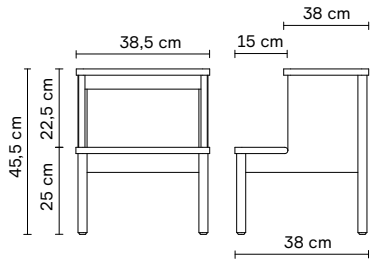

Our products combine a multi-functional approach with curiosity about possibilities and materials. How to optimize without oversimplifying? How to handle several needs in a single construction? A Line Stepstool and Step by Step Ladder are examples of this ambition. The stepstool doubles as a side table and as a bedside table, with storage space as an optional add-on. Step by Step Ladder also offers that little extra: when folded up, the step ladder can be hung on the wall so it is out of the way but handy.

Aymara Textiles

The Aymara textile line is following Nordic design traditions but is made of the finest and purest alpaca wool from the highlands of North Bolivia and produced by highly skilled craftsmen in Bolivia. They come only in natural colours of alpaca, with no dyeing process being involved.
