

KORPUS SHELF

DESIGN BY ANDREAS BERGSAKER

KORPUS SHELF

DESIGN BY ANDREAS BERGSAKER

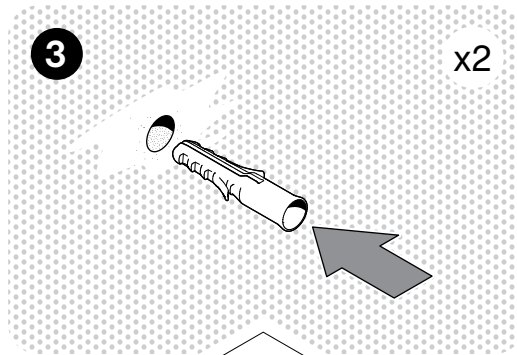

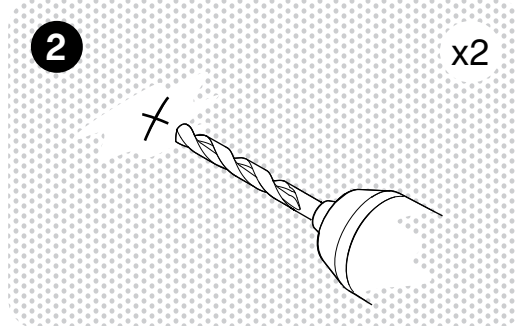

Please identify your wall type before mounting and use suitable fastening hardware. If in doubt, consult a professional.

When properly mounted to the wall:

Total max. load:
10 kg/22 lbs

Max. load on each individual hook:
5 kg/11 lbs

Follow the illustrated guide on the opposite side of this page along with this written guide.

- 1 Identify the size of your shelf and mark where to drill holes accordingly.
- 2 Drill holes using a drill bit that fits the size of your screws/wall plugs (not provided).
- 3 Identify your wall type and choose hardware accordingly. Consult a professional if in doubt.
- 4 Insert the screws. Leave an 8 mm (5/16") gap for the shelf to hang on.
- 5 Mount the shelf to the screws.
- 6 Push the shelf down so that it hangs on the screws. Make sure to insert the screws in the designated cut-outs, and not behind the hooks.
- 7 Finally, tighten the screws, without using excessive force.

Our Care & Maintenance offers guidance for optimal maintenance of your HAY product. It includes advice and instructions on cleaning and caring for specific materials to prolong the life of your furniture.
