

BUTLER

HAY

Born from the desire to create a versatile step ladder to fit modern urban lifestyles, Shane Schneck has created in Butler a clever and multifunctional household item.

Providing two extra steps when used as a ladder, the larger lower step allows it to be utilised as a side table, stool or bedside bench when not serving its primary function.

Crafted in solid oak with contemporary detailing, Butler comes pre-assembled and ready to use.

With a little care you can prolong the life of your furniture. Follow the instructions for the materials of your specific product to make sure that it stays in the best shape for as long as possible.

The information below is only intended as a general guideline. For more information on how to remove specific stains, please enquire where you bought the furniture.

- / Always remove stains quickly before they can do any permanent damage to the furniture.
- / Avoid placing the furniture in direct sunlight or near a strong heat source to reduce changes. As wood is a natural material, it will change in colour and will patinate over time.
- / When you move your furniture, make sure you lift it rather than pulling or pushing it to avoid damaging the floor, legs and mountings.
- / Be careful not to scratch or damage the surface with sharp objects.
- / Avoid covering the surface partially, for example with cushions or skins, as colour variances may appear.

OILED WOOD

Wipe with a clean, dry cloth. If the surface is dirty, wipe with a clean cloth wrung in water or in a solution of water and a neutral detergent or soap flakes. Remove any soap residue immediately using a clean, dry cloth. Never use soft soap or solvents such as spirit, turpentine or acetone.

Avoid using scouring cream or scouring pads, as they may scratch the surface. If the surface is scratched or appears matt, make sure to use an oil hardening care product specifically designed to maintain oiled wooden surfaces.

Clean the furniture thoroughly (12 hours) before applying the oil to all surfaces. To ensure optimal absorbency, gently sand down the wood using fine-grit sandpaper (No. 180 or 240), always sanding in the direction of the grain. Apply the oil generously using a clean cloth or a sponge, always applying in the direction of the grain. Do not pour the oil directly on the surface.

When the surface is glistening, leave the oil on for around two hours until fully absorbed. Remove any excess oil with a clean lint-free cloth. Leave the furniture to dry overnight (min. 12 hours) and avoid placing anything on the surface before it is completely dry.

If the grain of the wood rises after oiling, gently sand down the wood using fine-grit sandpaper (No. 180 or 240), always sanding in the direction of the grain. To optimally maintain the naturally beautiful appearance of the wood, we recommend you regularly treat the furniture's surface with oil whenever it appears dull, scratched or as needed.
